

10mm Concrete Injection Drill Bit – SDS Plus

Scan QR Code to Visit Our Website

Professional 10mm concrete drill bit designed for injection works and packer installation. Manufactured from hardened alloy steel with industrial tungsten carbide tip, ensuring high durability and precise drilling in concrete and reinforced concrete.

Technical Specifications

Product Type	Concrete Injection Drill Bit
Diameter	10 mm
Shank Type	SDS Plus
Tip Material	Tungsten Carbide (Industrial Grade)
Body Material	Hardened Alloy Steel
Available Lengths	160mm / 210mm / 260mm / 460mm
Application	Injection Packer Installation
Suitable For	Concrete, Reinforced Concrete, Masonry
