

2 Liter Tank for Injection Pump – Resin Container

Scan QR Code to Visit Our Website

The 2 Liter Injection Pump Tank is a durable resin container designed for drill type and light injection pumps. Manufactured from high-quality HDPE material, it is resistant to polyurethane (PU), epoxy and other chemical injection materials. It features volume markings for accurate material control and a secure screw cap to prevent leakage during operation.

Technical Specifications

Capacity	2 Liters
Material	High-Density Polyethylene (HDPE)
Volume Marking	250 ml – 2000 ml
Cap Type	Screw Cap – Leak Resistant
Outlet Connection	Standard Thread for Injection Pumps
Chemical Resistance	PU Resin, Epoxy, Acrylic
Application	Drill Type & Light Injection Pumps
Reusable	Yes
