

Complete Piston Assembly – Drill Type Injection Pump

Scan QR Code to Visit Our Website

The Complete Piston Assembly for drill type injection pumps is designed for low to medium pressure resin injection applications (10–30 Bar). It ensures smooth reciprocating performance and reliable sealing for polyurethane (PU), epoxy and other waterproofing materials.

Technical Specifications

Working Pressure	10 – 30 Bar
System Type	Reciprocating Piston
Body Material	Alloy Steel
Shaft Material	Wear-Resistant Stainless Steel
Sealing System	Chemical-Resistant O-Rings
Compatible With	PU Resin, Epoxy
Application	Drill Type Injection Pump
