

# High Pressure Injection Pump Catalog

## Model: Superfinish CH23H

The CH23H high pressure injection pump is designed for professional construction and industrial applications. Suitable for epoxy, polyurethane and resin injection for waterproofing and structural repair.

### Key Features:

- 2–3 HP Electric Motor
- Maximum Pressure up to 500 Bar
- Accurate Pressure Gauge
- Heavy-duty steel frame with wheels
- Suitable for Epoxy & Polyurethane Injection
- Industrial durable design

### Technical Specifications:

Motor Power	2–3 HP
Voltage	220V
Max Pressure	500 Bar
Pump Type	High Pressure Piston
Weight	Approx. 40 Kg
