

Injection Packer (Mechanical Type)

Taghati Technical & Engineering Company

Mechanical injection packer designed for high-pressure injection of polyurethane, epoxy, and other resin materials into concrete cracks for waterproofing and structural repair applications. Suitable for industrial, civil, and underground construction projects.

Specification	Details
Product Type	Mechanical Injection Packer
Material	Galvanized Steel (Corrosion Resistant)
Available Diameters	10mm 13mm 14mm
Available Lengths	5cm 10cm 15cm
Working Pressure	Up to 400 Bar (Depending on Pump)
Connection Type	Standard Grease Nipple Head
Application	Concrete Crack Injection & Waterproofing

Tiered Pricing Structure

Order Quantity (pcs)	Unit Price (Toman)	Discount
Up to 200 pcs	110,000	Base Price
200 – 1000 pcs	99,000	10% Discount
1000 – 5000 pcs	93,500	15% Discount

Applications

Applications: - Tunnel waterproofing - Basement leakage repair - Structural crack injection - Water tank & swimming pool sealing - Industrial concrete rehabilitation
