

PURIN 404 – Two Component Expanding PU Injection Resin

Scan QR Code to Visit Our Website

PURIN 404 is a two-component expanding polyurethane (PU) injection resin system designed for permanent waterproofing and structural crack sealing. The A+B system reacts to form a flexible closed-cell foam that provides high expansion and excellent adhesion to concrete and masonry surfaces.

Technical Specifications

| | |
|------------------|----------------------------------|
| Product Code | PURIN 404 (Component A + B) |
| Type | Two-Component Expanding PU Resin |
| Mixing Ratio | 1 : 1 by Weight |
| Foam Type | Closed-Cell Flexible Foam |
| Expansion Ratio | Approx. 10–20 Times |
| Viscosity | Medium – High Penetration |
| Application | Concrete Crack & Joint Sealing |
| Injection Method | High Pressure Injection Pump |
| Packaging | Set (A + B Drums) |
