

PURIN 112 – Expanding Polyurethane Injection Resin

Scan QR Code to Visit Our Website

PURIN 112 is a water-reactive expanding polyurethane (PU) injection resin designed for sealing active water leaks and concrete cracks. It forms a flexible closed-cell foam, creating a durable waterproof barrier.

Technical Specifications

Product Code	PURIN 112
Type	Expanding Polyurethane Injection Resin
Reaction	Water-Activated Expansion
Foam Type	Flexible Closed-Cell Foam
Expansion Ratio	Approx. 20–30 Times
Viscosity	Low – High Penetration
Application	Concrete Crack & Active Leak Sealing
Injection Method	Low or High Pressure Pump
Mixing Ratio	Accelerator 5%–10% (Adjustable)
Packaging	25 Kg Resin + 2.5 Kg Accelerator (Set)
